

World's 1st LEED Platinum Dental Building

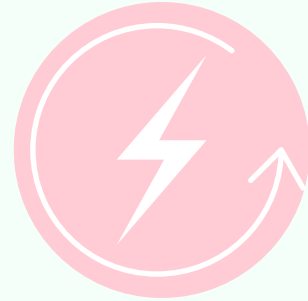

Leadership in Environmental Energy Design

LEED is the most widely used green building rating system in the world. Available for virtually all building types, LEED provides a framework for healthy, highly efficient, and cost-saving green buildings.

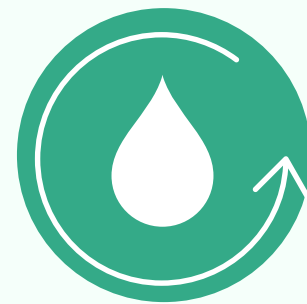

Interior spaces with ample natural light from our floor to ceiling windows.

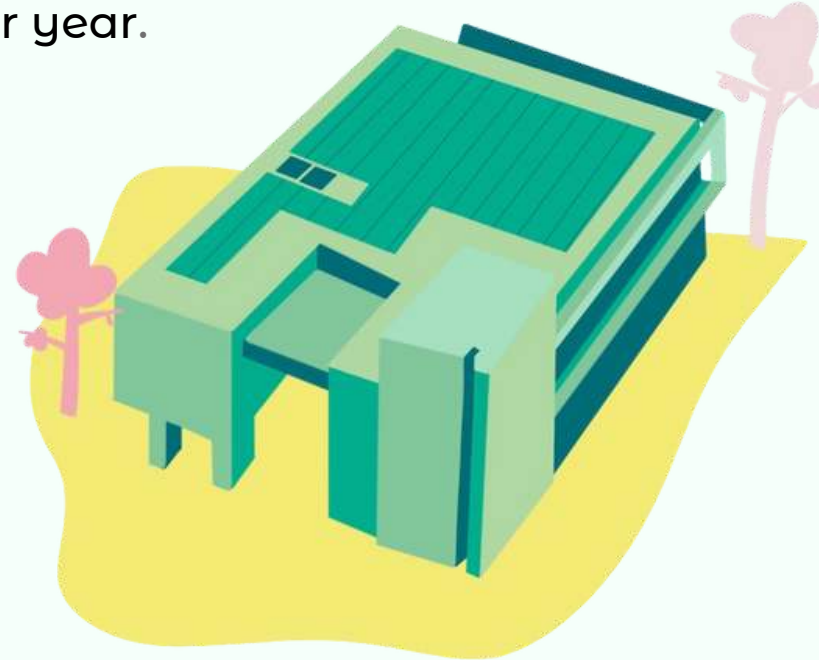

Solar panels generate 107,000 KWh per year.

Automatic ultra low flow faucets and toilets.

Underground water cistern collects rainwater used to irrigate native landscaping.

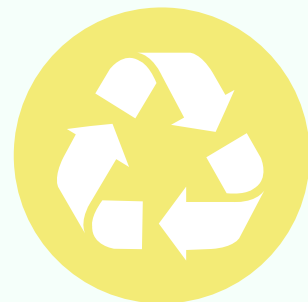

All wood used in our office was sourced from sustainable forests and FSC Certified..

Fun Fact

Our building is fully powered by 188 large solar panels located right on the roof of our building!

Fun Fact

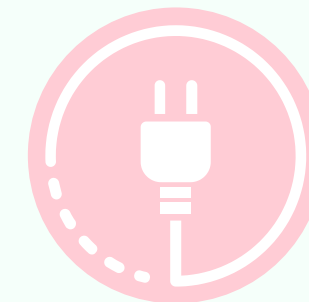

Our landscaping is irrigated from rainfall that has been collected by our roof via a large underground cistern.

Materials and surfaces are made of over 40% recycled products.

Locally sourced materials such as Florida Keystone.

Electric vehicle parking and charging stations.

Fun Fact

Your dental home was constructed using over 40% recycled materials.
